SHORT TITLE AND COMMENCEMENT :

- (i) This plan shall be called Rural Electricity Plan.
- (ii) This plan will come in to force from the date of issue of this notification.

Rural Electrification Plan 2007- 2012

The Rural Electrification Plan 2007-2012 for the State of Gujarat shall be as follow.

Chapter 1 Introduction

Rural Electrification Plan for Gujarat State

In compliance with Sections 3.4 of the Central Govt. "Rural Electricity Policy" and under the provisions contained in section 4 and 5 of the Electricity Act, 2003, the Government of Gujarat intends to notify the Rural Electrification Plan for the State to achieve the National goal for providing access to electricity for all rural households during the next five years i.e. by 2012. This is also as per the provision under section-2 of National Electricity Policy.

This Plan will come into force from the date of its notification.

01 INTRODUCTION

Gujarat state came into existence as a separate State on 1st May 1960. The State is situated on the west coast of India between 20-6' N to 24-42' N north latitude and 68-10'E to 74-28'E east longitude. It is surrounded by

the Arabian Sea in the West, by the States of Rajasthan in the North and North-East, by Madhya Pradesh in the East and by Maharashtra in the South and South East.

The State has an international boundary and has a common border with the Pakistan at the north-western fringe. The two deserts, one north of Kachchh and the other between Kachchh and the mainland Gujarat are saline wastes.

The State has a long coast-line of about 1600 kms. and is the longest among all States of country. For the purpose of administration, Gujarat State at present comprises of 25 districts, sub-divided into 226 talukas, having 18618 villages and 242 towns. Gujarat has geographical area of 1.96 lakh sq.kms. and accounts for 6.19 percent of the total area of the country.

DEMOGRAPHY

According to the provisional results of Population Census 2001, the population of Gujarat as on 1st March 2001, stood at 5.06 crore, including the estimated population of earthquake affected areas. The decadal growth rate of the decade 1991-2001 has increased in comparison to 1981-1991 from 21.19 percent to 22.48 percent.

01 OBJECTIVE: -

Ministry of Power, Govt. of India vide its resolution No. 44/26/05-RE (Vol-VII) dated 23.08.2006 has modified the National Rural Electrification Policy.

In accordance with the National Rural Electricity Policy and in compliance of section-6 of Electricity Act-2003, Govt. of Gujarat hereby notifies the Rural Electricity Plan for achieving the following objectives: -

- Provision for access to electricity for all rural households during the next five years.
- Quality and reliable power supply at reasonable rates.
- Minimum life line consumption of 01 unit per households per day as a merit goal by year 2012

Para No.-3.4 of the said policy stipulates that the State has to prepare and notify a Rural Electrification Plan to achieve the goal for access to electricity for all households.

The Govt. of India has introduced a new scheme "Rajiv Gandhi Grameen Vidyutikaran Yojna (RGGVY) -for Rural Electricity Infrastructure and Households electrification and the guidelines were issued by Ministry of Power, Govt. of India vide letter No.-44/19/2004-D (RE) dated 18th March 2005.

The scheme would be implemented through Rural Electrification Corporation (REC), which has been designated as the Nodal Agency. The responsibility of implementation of the district wise projects under the scheme have been entrusted to CPSUs(PGCIL) for 2 nos. districts namely Bharuch and Narmada. Remaining 23 nos. districts, execution of the projects will be on a turn-key basis.

Deployment of franchisees for the management of rural distribution in projects financed under the scheme and ensures determination of bulk supply tariff for franchisees in a manner, which ensures their revenue return substantially with improved services to consumers.

In view of the targets included in the National Electricity Policy it is essential to develop generation capacity in power sector to meet the above goals, which are included in Rajiv Gandhi Grameen Vidyutikaran Yojna as framed by Ministry of Power.

The Govt. of Gujarat shall be the owner of the assets created in the implementation of the projects as proposed by the State Govt. and sanctioned by REC. The Govt. of Gujarat shall authorize GUVNL and their associated distribution companies to operate and maintain these assets for effective power supply in the project areas and derive consequential benefits out of the assets created under the project by way of revenue to be received against O&M of the system and the cost of power supplied.

Now, therefore in consideration of foregoing para, Govt. of Gujarat notifies the Rural Electrification Plan for the State.

Rural Electrification Plan shall be a for five year period, beginning from April '2007 and will be known as: - "Rural Electrification Plan 2007-2012" and shall fulfill objective with regard to providing reliable and quality power supply to the consumers within the State, besides access to electricity to all house-holds in next five years, with achievement of merit goal of 01 KWH (Unit) per house hold per day by the year 2012.

3. APPROACH TO RURAL ELECTRIFICATION: -

For villages intensive distribution net-work having distribution voltage of 11000 Volts & 440 Volts shall be developed and necessary infrastructure of distribution net-work sch as Sub-station, distribution transformer, LT Line, complaint centers etc. shall be developed. The development of infrastructure is to be ensured in the schemes under implementation by state utilities and setting up of complaint centers and related mechanism to ensure services to consumers by the franchisee (s).

Each electrified village included in the plan shall include: -

- Basic infrastructure such as Distribution Transformer and Distribution Lines in the inhabited locality as well as a minimum of one Dalit Basti/ Hamlet where it exists; and
- Electricity provided to public places like Schools, Panchayat Office, Health Centers, Dispensaries, Community Centers etc.; and

Number of households to be electrified should be atleast 10% of the total number of households in the village. As per the RE plan 2007-12 adopted by Govt. of Gujarat State, Govt. shall notify a village as electrified only after fulfilling the above mandatory requirement.

Gram Panchayat/ association of consumers subject to fulfillment of the technical and financial requirement shall be involved in the development of various activities in the business of electricity including responsibility of operation and maintenance of distribution net-work in Rural areas.

Further, plan shall also encourage domestic lightning scheme for areas which are not possible by conventional grid supply will be considered for following methods by Gujarat Energy Development Agency (GEDA): -

- To have stand alone local distribution network based on solar lightning system or any other resource like wind etc.
- To have stand alone local distribution based on generator running on Bio-diesel or diesel in rural areas, which are being notified as Rural areas as per the provision of Electricity Act-2003.

4. SCHEME FOR RURAL ELECTRICITY INFRASTRUCTURE & HOUSEHOLD ELECTRIFICATION-UNDER RGGVY: -

The Govt. of India, Ministry of Power has reviewed the existing schemes of Rural Electrification and has launched a comprehensive programme of RGGVY in which all the 25 districts of the State are included. Under this scheme the project will be financed with 90% capital subsidy for the following provision.

- Rural Electricity Distribution Backbone (REDB)
 - Provision of 66/11 kV sub-stations of adequate capacity and lines in blocks where these do not exist.
- Creation of Village Electrification Infrastructure (VEI)
 - Electrification of un-electrified villages.
 - Electrification of un-electrified habitations.
 - Provision of distribution transformers of appropriate capacity in electrified villages/ habitation(s).

Under RGGVY projects works are required to be carried out on turnkey contracts. As per the quadripartite agreement made with GoG, REC Ltd., M/s.PGCIL, and Distribution Companies M/s.PGCIL is appointed as turnkey agency being CPSU in Bharuch and Narmada districts. Whereas in other districts, agency for turnkey work is selected from the open tender competition. Requirement to be fulfilled by the bidder in general is given as below.

- Bidder has to procure the line material as per standard specification.
- Bidder has to execute the works as per REC standard of works.
- Bidder requires minimum work experience of 150 KM 11 kV lines.

- Bidder should have minimum capacity of Rs.5 crores annual turn over.
- Technical scrutiny of tenders received is evaluated on basis of tender specification of line materials to be supplied.
- Successful tenders are eligible for "price Bid "opening.
- Bidders meeting the competitive rate are selected for different lots.
- L.O.I./A.T. is awarded to successful bidder for execution of RGGVY project.

5 TAKING OVER OF RGGVY PROJECT BY DISTRIBUTION COMPANIES OF GUJARAT

The concerned CPSU / Turn key Contractor will intimate and handover the project to Discoms, upon successful commissioning and test charging of the same (In part or full, as the case may be) and discoms will take over the project(s) and commence operation and maintenance of the project(s) at their own expenses and shall also ensure compliance of provisions as indicated in the tripartite / quadripartite agreement. Discoms will issue necessary taking over certificate subject to rectification of defects/ faults, if any.

The operation and maintenance of the same shall be the responsibility of DISCOMS, as and when the project is commissioned and taken over from turn key contractor.

6 PROMOTION OF NON CONVENTIONAL SOURCE OF ENERGY

Govt. of Gujarat, is committed to encourage the development of local stand alone system in the area based on solar home light system and generation of electricity from the generators running on bio- diesel or diesel. State Govt. shall facilitate such projects by giving quick clearances through administrative measures such as single window clearance with easy access for giving necessary approval in a time bound manner to fully utilize the potential of our local resources. This will cover those area which are otherwise not feasible for electrification by conventional grid power.

Gujarat Energy Development Agency- GEDA, is registered under the Charitable Societies Act of 1869, and was established by the Government of Gujarat disseminates energy information and play a catalytic role in development and promotion of renewable energy technologies.

Renewable Energy Technologies and Energy Conservation measures are promotes and popularize through schemes and programmes formulated in the light of the Central and State governments policy.

7 MONITORING OF THE PLAN: -

The progress of the plan shall be monitored by the State Govt. through a high level committee headed by Principal Secretary (Energy), on a quarterly basis and Govt. shall facilitate the resolution of all the difficulties in implementing the works under RGGVY and achieve the objectives of the plan. The State Govt. have constituted

ACTION PLAN FOR RURAL ELECTRIFICATION

Electrical energy has always been considered as yardstick for the progress of the nation and standard of living. The growing demand of electrical energy in all the spheres of National economy and in domestic use needs a steady increase of power generation. For the development of electric power, it is necessary to install more generating units to bridge the gap between demand and supply. Gujarat has evolved into a leading Industrial State in the country with a formidable reputation for attracting foreign and domestic investment. The state has built its credibility through successive achievement through accelerated growth over the past few decades. Agricultural development has also taken pace with the development of the industries. Keeping this in view, right since the inception of the State in May-1960, substantial resources has been diverted towards the development of the power sector. This has resulted in the increase of installed capacity of the state from 315 MW in 1960 to 9561 MW at the end of year 2006-07.

Similarly sufficient investment has been made for transmission and distribution system to supply adequate power to the far-flung areas of the states. As a result per capita consumption of power in the state is an impressive figure of 1313 units during 2005-2006, which is much higher than the All India average. Further Gujarat has also achieved nearly 100% electrification of villages, thus making it one of the most advanced states in the country in terms of consumption of power.

Power Sector Reform in the State/GEB

The Gujarat Electricity Industry (Reorganization & Regulation) Act-2003 has already been passed in the State Assembly. This has paved the way for comprehensive reforms and restructuring of the Electricity Board. The Electricity Act 2003 also stipulates restructuring / reform of the Electricity Board to make it financially viable.

For Generation, Gujarat State Electricity Corporation Ltd (GSECL) has been functioning since 12-08-1993. For Transmission, Gujarat Energy Transmission Corporation Ltd. (GETCO) has been formed since 19.5.1999 to take over the Transmission business.

GEB has already been bifurcated functionally in to Generation, Transmission and Distribution Companies. The four new Distribution Companies have been incorporated under Companies Act 1956 in September 2003. The four new Distribution Companies are as shown below.

- 1) Dakshin Gujarat Vij Company Ltd-DGVCL
- 2) Madhya Gujarat Vij Company Ltd.-MGVCL
- 3) Uttar Gujarat Vij Company Ltd.-UGVCL
- 4) Paschim Gujarat Vij Company Ltd.-PGVCL

The existing distribution Zones at Surat, Baroda, Mehsana and Rajkot are the corporate headquarter of respective discoms. The Paschim Gujarat Vij Company comprises two Zones i.e. Rajkot and Bhavnagar to ensure financial viability. Gujarat Urja Vikas Nigam Ltd. (GUVNL) is incorporated in Dec 2004.

It is also envisaged that the GUVNL as a main holding company co-ordinates functions of other companies and look after the residual functions such as bulk power purchase, supply and trading activities.

The Government has notified "Comprehensive Transfer Scheme", transferring all the assets, liabilities, proceeding and the personnel to these new entities. These companies have been made functional from 01-04-2005. State of Gujarat came in to existence on 1st May, 1960 Table below shows the progress made on major financial and physical indicators of power sector in Gujarat. It can be seen that in thirty-six years of planning there has been about fifteen-fold rise in per capita consumption of electricity indicating progress of industrialization and prosperity of the state. **All the feasible villages and towns are also electrified facilitating access to electrical power to any person of the state.**

As on 31-3-07 fulfilling Governments commitment to farmers and helping upliftment of agricultural sector, state has electrified 839676 pump sets.

*As per 1991 census some villages are merge in Town area. **As per 2001 census.

The direct & indirect increase in demand for electricity as a result of implementation of RGGVY will necessitate augmentation of distribution infrastructure. The existing Generation capacity and Transmission network is capable to cope-up the increase in demand and hence augmentation covered in this R.E. plan is for other than industrial and agricultural demand.

Chapter 3 Power Generation**Position & Programme****Power Generation.**

The 16th Electric Power Survey by the Central Electricity Authority envisages a capacity requirement of around 19762 MW by the end of the 11th Five Year Plan. With an installed capacity of 9224 MW, this translates into additional capacity requirement of around 10,000 MW during the 11th Plan Period. The State has taken a lead and **planned for 11,000 MW** with the state sector contributing 4500 MW, Central Sector 1400 MW and Private Sector 5100 MW. Gujarat Urja Vikas Nigam Limited has already acted upon its plan and procured 3200 MW of power through competitive bidding process.

The Ministry of Power's effort to initiate the development of the Ultra Mega Projects with capacity of 4000 MW + each is a step towards generation addition. Mundra in Kutch District of Gujarat was chosen as a site for developing one such project. State is providing all requisite support in terms of clearances within the State and to act as a facilitator in the process and have also purchased 1900 MW from the same. State have also expressed interest to purchase power from Ultra Mega Power.

Most of the capacity addition in the State is envisaged in the form of thermal energy. Gujarat, not blessed with **hydropower resources**, has already exploited the limited resources available to the full. Whatever little remains is in the form of mini and micro hydel projects. A policy for promotion of such small hydro project has recently been finalized.

7. GENERATION ADDITION IN NEXT FIVE YEARS(2007-12)

The strategies for power development in Gujarat will have to keep in view the following special features of the energy economy in the State:

- a) The hydro resources and exportable coal resources of Gujarat are too small to support a major power programme. The major hydro resources outside Gujarat are located far away in the Northern Region and may not be available for any significant quantity for use in Gujarat. Thermal Power generation based on coal, as fuel would require haulage of coal over long distance and transportation of coal to various Power Stations is gradually becoming a serious bottleneck.
- b) The location of large gas and oil reserves along the Gujarat coast & programme for their rapid exploration and the present policy trends favoring selective use of hydrocarbons for power generation to overcome critical power shortages are of interest to Gujarat.
- c) GSECL has tried to use Imported coal, which has higher gross calorific value and less ash content. So that PLF of the Power Station will improve and with less polluted atmosphere.
- d) The policy to produce power at coal pithead location and transmit the power at extra high voltage line will be cheaper than transporting the coal over long distances, which also reduces the burden on railways.
- e) Gujarat has significant potential for wind and tidal power generation. A beginning has been made to harness the wind potential for power generation along Saurashtra coast. A feasibility study to harness the tidal potential in the Gulf of Kutchh has been carried out. These non-conventional energy sources are of significant in the longer term.

(1) Wind Power :

The state is blessed with a 1600 Km long coast line that has an average wind speed of 20 Km/hr that is suitable for power generation. The State has a potential of setting up of 10000 MW of Wind farms for power generation that can take care of power deficit to a large extent. The State of Gujarat is committed to have investment in clean and green energy to reduce carbon dioxide emissions. In order to tap the potential of the energy the State Government has announced a new Wind Power Policy – 2007-12. Under this policy, any company or body corporate or association or body of individuals, whether incorporated or not, or artificial juridical person, will be eligible for setting up of Wind Turbine Generators, either for the purpose of captive use/or for setting of electricity, in accordance with the Electricity Act 2003, as amended from time to time. So far wind farms of total installed capacity of 649 MW are installed in the State of Gujarat. With the announcement of new Wind Power Policy – 2007-12 and land policy of State Government wind farms of additional approximate 625 MW capacities shall be commissioned during

2007-08. The power generation through wind energy shall be promoted by the State Government and it is planned to add additional capacity of 4000 MW during the next five years.

(2) Off Shore Wind Farms :

Gujarat State is covered with long coast line of about 1600 kms of Arabian Sea and Gulf of Kutchh. Assessment and exploration of setting up of OFF SHORE Wind farms, for improved annual power generation from Wind farms will be taken up by GEDA in next five year.

(3) Water Pumping Wind Mills :

The water pumping wind mills are installed in the State for Village drinking water supply, minor irrigation, nursery, institutions water supply etc. A gear type wind mill with 18 blades on 10 meter tower is installed on open well or bore well. About 0.5 to 1.0 hectare land can be irrigated with approximate water out put of 20,000 liter per day. So far over 1000 numbers of water pumping wind mills are installed in the State and are successfully working. It is planned to install 100 numbers of water pumping wind mills during the year 2007-08 and about 500 numbers in next five year.

Gujarat State has planned for enhancement of Generation capacity to meet the demand of future load growth under Normal Development. Gujarat State has enough administrative capacity to build power plants. Year wise capacity addition in MW for Generation of electricity in next five years is shown below.

Chapter 4**Power Transmission Position & Programme****8 TRANSMISSION ADDITION IN NEXT FIVE YEARS (2007-12)**

Transmission Scheme : Number of 400 KV & 220 KV schemes have been planned during 11th five year plan so that 400 KV and 220 KV sub stations can be established in the load centers of the state. The existing power map showing E.H.T. lines is attached in Annexure. This will reduce the burden on 66 KV system which will be limited to the particular pockets only. As a result long transmission lines of the 66 kV class will be reduced. This will help in the following way:

- Short distance 66 KV lines will maintain proper voltage regulations.
- Short distance 66 KV lines are more reliable and will provide stability in power supply to the consumers.
- Due to short distance, 66 KV network transmission losses will be minimized.

Planning is done for commissioning of 400 KV and 220 KV transmission lines for evacuation of power from the power projects, which were to be commissioned during 10th plan. EHV sub station and transmission lines are planned for commissioning during 11th FYP, which will improve voltages in the system where low voltages are experienced during peak hours and load season. Planning is also made to augment the capacity of existing transmission line by up rating or up-grading. Installed capacity of existing sub station will also be augmented during 11th FYP to match with the additional and pending power demand of the area. Installation of shunt capacitor at various sub stations in the system is planned for reactive power support, which in turn will improve voltage profile. Due to improved voltage profile there will be reduction in transmission losses and further load can be released with existing system. Planning is made for improving communication system for better and quick operation of grid system.

For strengthening of existing system, number of new transmission lines and sub stations are proposed to be established in 11th FYP. Transmission schemes planned during 11th FYP are on the following basis.

- 1) Schemes are provided on need base of system and expected load growth and generation during 11th FYP. Schemes are planned and provided considering the ongoing schemes and schemes approved during 10th plan but which are not completed. These are considered as spill over works of 10th plan and new works of 11th plan.
- 2) 400 KV schemes provided under 11th plan is for evacuation of power from new power projects planned for completion during 11th FYP including private sector power projects and central sector power project. These schemes will also improve power stability and improvement of voltage in Saurashtra and North Gujarat area.
- 3) 220 KV schemes proposed are for evacuation of power from new power plants. Some 220 KV schemes are proposed for improvement of voltage profile and to make up with shortcoming in the transmission system in remote area where great potential for load development is expected.
- 4) 66 KV schemes have been proposed to feed important load center, to improve voltage regulation, to reduce T&D losses and to improve quality of power supply.
- 5) Schemes provided covers proposal for installation of Shunt Capacitors for reactive system support. Augmentation of existing capacity of EHV sub stations and transmission lines are also included.
- 6) Schemes provided covers Renovation & Modernization of existing sub station and transmission lines. Replacement of equipment's which have completed its rated life and equipment's having inadequate capacity. Replacement of deteriorated conductor by improved quality and higher capacity conductor.
- 7) Schemes covers creation of area load dispatch centers along with reliable communication system.

Gujarat State has planned for enhancement of Transmission capacity to meet the demand of future load growth under Normal Development. Gujarat State has enough administrative capacity for erection of new sub stations. Year wise capacity addition in MVA for Transmission network in next five years is shown below.

VILLAGE ELECTRIFICATION IN THE STATE

Rural Electrification being welfare activity of the state helping improvement of life style and upliftment of economic activities in the rural areas will have to be continued and given high priorities. All the villages since been electrified in the state, intensification of already electrified rural areas will be given high priority. State Government will provide plan support, in addition to non-plan programme of GUVNL for rural electrification. The status of village electrification in the state as on 31-3-07 is as under.

As per census 2001, the total villages are 18538 nos. out of these 473 nos. villages are un inhabited and 18065 nos. villages are inhabited. Village electrification program is required to operate in 18065 nos. villages.

11 ELECTRIFICATION OF HAMLETS IN GUJARAT

After village electrification drive is over, new areas are emerging in outskirts of villages, which requires to cover under intensification programme. There is no specific identification in Govt. census. However Govt. of Gujarat has published separate booklets showing newly created hamlets in tribal areas and in non-tribal areas. Under the electrification programme of hamlet / petaparas, electricity is provided to un electrified house holders by extending existing network. Gujarat have electrified 12359 nos. of petaparas by 31-3-07 under State Govt. and REC assistance. The balanced unelectrified petaparas and newly created pataparas are covered under State Govt. "Tribal Area Sub Plan", and Special Component Sub Plan and M.P. LAD Scheme

and MLA Grant etc. The houses in a group are given priority in electrification programme. Under Rajiv Gandhi Gramin Vidhyutikaran Yojana 3163 nos. of unelectrified pataparas are covered. This will provide electricity to all the BPL households as well as will provide access of electricity to APL households. The details of work carried out in hamlets are shown as below.

Moreover under the non conventional energy programme Govt. has acted to harness non conventional energy.

Solar Energy :

The Solar radiation available in the state has an equally abundant potential for harnessing energy through solar thermal and photovoltaic conversions. Given the acute shortage of conventional energy sources, the solar energy option in the domestic, commercial and industrial sector is going to be a boon in the years to come.

(1) Remote village electrification with solar Photovoltaic systems;

The programme of electrification of remote village as per the list provided by the Gujarat Urja Vikas Nigama Limited (GUVNL). Vadodara is being implemented by GEDA with Central Finance Assistance of Ministry of New and Renewable Energy (MNRE), GOI, and State Government. So far 38 villages have been electrified by providing solar home system Consisting of 2 number of 9w CFL, 37 Wp module, 12V, 40Ah battery, charge controller etc. The Solar street lights consisting of 11 W CGL, 74 Wp module, 12V, 74Ah battery and 4 meter MS pole are also installed for electrification of streets. It is planned to cover 25 villages during the year 2007-08 and in next five year GEDA has planned to cover 100 number of un-electrified villages/Peta Para/Para as per the information and list obtained from GUVNL for electrification by solar lighting.

Shiyalbet Project (Island)

Shiyalbet is an un-electrified Island having 75.32 ha area. The approach to the village is through boat that operates from Pipavav which is about 650 meters in Arabian Sea. As per the households survey undertaken by GEDA during July 2004, the total population is 2145 male & female & children 3232. There are 984 nos of households, 1 no of community building, 10 nos of temple, 2 nos of community hall & 1 no of Primary school.

Since the power is not available at the Island. GEDA has proposed to carry out detailed feasibility study which will cover possibility of installation of various non-conventional Energy systems for meeting the total energy requirement of the village by locally available renewable sources of energy during the year 2007-08. GEDA had submitted a proposal to MNRE, GOI, for Central Finance Assistance under remote village electrification programme and GOI has given Administration approval. So it will be implemented during the current year.

HOUSE HOLD ELECTRIFICATION IN NEXT FIVE YEAR(2007-12)

As per census 2001 Gujarat have 59,18,559 rural houses. Out of this Gujarat have electrified 36,48,500 houses as on 31-3-07. To achieve the goal "Electricity to All", The Government has planned to electrify balance 22,70,059 rural houses including BPL households by 2012. There are numerous schemes operative in the state for providing electricity to un-electrified houses. The details of these schemes in brief are as under.

- 1) Hutment Electrification Scheme (Hutment in Slum)
- 2) Kutir Jyoti Scheme By State and REC Ltd.
- 3) Electrification of Harijan Basties (S.C. Locality)

HUTMENT (Slum) ELECTRIFICATION

The scheme is for electrification of hutments of all caste of people living in the slum area of the state, having annual income less than 11,000/- .The beneficiary of this scheme requires his houses of more than 7 feet height with adequate space for safe meter installation. State Govt. provides financial assistance for single point connection at free of cost under this scheme. Necessary infrastructure like HT/LT lines and transformer is provided depending upon the nature of slum. Gujarat have so far provided 1,42,893 nos. house hold connections under this scheme by 31-3-07. Year wise and district wise works carried out in Gujarat is as under.

KUTIR JYOTI YOJANA

To meet the requirement of providing electricity to the poor family, located in tribal area, state Government is allocating financial assistance under "Kutir Jyoti Scheme". Under the Kutir Jyoti Scheme, single-phase connection with single point wiring is being given free of cost. The list of beneficiaries, is prepared by the project administrator of the respective areas and submitted to the local office of Discom's. The tribal family whose annual income is less than Rs.11000 per year and house situated within 100 mtrs radius from the existing LT distribution lines, are eligible to avail the single phase connection with single point wiring. On receipt of list of beneficiaries, electric connection is given. This scheme is operative in the state since 1990-91, with Govt. assistance as a grant. REC Ltd New Delhi has also provided assistance during 1992-93 to 2004-05 for Kutir Jyoti Scheme. During 2007-08, REC ltd. has shown interest to allocate fund for providing electricity to all un electrified A-category BPL households in 22nos. districts. (i.e. excluding 3 nos. districts sanctioned under RGGVY Projects). Gujarat have so far provided 2,84,308 nos. house hold connections under this scheme by 31-3-07.

During 11th FYP it is planned to electrify 60,000 Nos. of connections at an estimated cost of Rs.1500 lacs under Kutir Jyoti (State) scheme.

SPECIAL COMPONENT SUB-PLAN

For electrification of Schedule Cast Localities, State Government is allocating the fund every year for implementing the programme under "Special Component Sub Plan". Under this scheme, electrification is being carried out every year in the localities from where demands are coming. Social Welfare Deptt. at District / Taluka level is furnishing the list of un electrified S.C. localities to the Discoms. The booklet showing identification of 25,534 Nos. S.C. Localities was made available by Social Justice Deptt. of Gujarat Govt. in 1995. In first phase, S.C. Localities from the booklet was completed, there after electrification of newly developed S.C. localities were undertaken. Thus, Gujarat has electrified so far 62,857 nos. of S.C. Localities.

The details of S.C. Localities Electrified as on 31-3-07.

Chapter 6

RAJIV GANDHI GRAMIN VIDYUTIKARAN YOJNA (RGGVY)

The RGGVY Scheme has been launched to fulfill the commitment of the National Common Minimum Programme (NCMP) of completing the household electrification in next 5 years and modernizing the rural electricity infrastructure.

Since independence so far only about 44% rural households could be given access to electricity and more than one lakh villages are still to be electrified. The new programme involves providing access for electricity to 7.8 crore rural households in five years. Accomplishing this task in a period of 5 years is going to be an unprecedented event in our endeavor to develop India. Under the scheme, projects could be financed with 90% capital subsidy for provision of:

- Rural Electricity Distribution Backbone (REDB): Provision of 33/11 KV (or 66/11 KV) substations of adequate capacity and lines in blocks where these do not exist.
- Creation of Village Electrification Infrastructure (VEI): This includes -
 - Electrification of un-electrified villages.
 - Electrification of un-electrified habitations
 - Provision of distribution transformers of appropriate capacity in electrified villages/habitation(s).
- Decentralized Distributed Generation (DDG) and Supply:
 - Decentralized generation cum-distribution from conventional sources for villages where grid connectivity is either not feasible or not cost effective provided it is not covered under the programme of MNRE for providing electricity from non-conventional energy sources under their remote village electrification programme.
 - REDB, VEI and DDG would also cater to the requirement of agriculture and other activities including irrigation pumpsets, small and medium industries, khadi and village industries, cold chains, health care, education and IT.

This would facilitate overall rural development, employment generation and poverty alleviation.

Eligibility Under RGGVY Scheme :

Below Poverty Line Unelectrified Households are eligible for household electrification under RGGVY scheme free of cost. Households above poverty line would be paying for their connections at prescribed connection charges and no subsidy would be available for this purpose.

A separate programme is being implemented by the Ministry of New and Renewable Energy (MNRE) earlier known as Ministry of Non-conventional Energy Resources (MNES) for electrification of remote villages.

The RGGVY merges the scheme of Accelerated Electrification of One Lakh Villages and One Crore Households and the Minimum Needs Programme for Rural Electrification covering remote villages. There are substantial funds allocated under this scheme. It is however important to ensure that the funds are well invested and bring recurring and sustainable benefits to the rural populace. Funds shall be provided by REC as 90% grant and 10% loan. Electrification of villages and household are the main thrust areas.

The scheme provides for free of cost connection to all rural households living below poverty line. Further, there will no discrimination in the hours of supply between rural and urban areas.

The earlier focus of electrification in rural areas had been primarily for irrigation and it has been done generally by extending the LT lines in a piecemeal manner resulting in unreliable and limited hours of power supply. The new programme aims at a qualitative transformation of the rural electricity infrastructure. It envisages that there will no discrimination between urban and rural areas in respect of hours of supply. 24 hours supply of good quality power would also enable dispersal of small industries, khadi and village industries in the rural areas.

It will also facilitate delivery of modern health care, education and application of information technologies. This is aimed at accelerated rural development, employment generation and poverty alleviation.

The scheme also lays special emphasis on sustainability of rural supply through collection of the cost of electricity from the beneficiaries. To achieve this objective, it is proposed that franchisees like NGOs, consumer associations etc. will be deployed with appropriate involvement of Panchayati Raj institutions. The State Governments will be free to provide appropriate targetted subsidy to poor households.

The Central Government has also offered the project implementation and management expertise of its Central Power Sector Undertakings like NTPC, NHPC, PGCIL and DVC to the States who are willing to make use of these services for ensuring timely completion of the project in this scheme.

The scheme has a target of electrifying 1,25,000 un-electrified villages and giving access to 7.8 crore uncovered rural households in next 5 years. The Central Government has already approved Rs.5000 crore for providing capital subsidy for this scheme in the remaining period of 10th Five Year Plan. Total estimated cost of the scheme is Rs.16000 crore which will also continue during the 11th Plan period.

Annexure - III**GUIDELINES FOR FRANCHISEE DEVELOPMENT****1. Introduction**

The Government of India has approved a new scheme, "Rajiv Gandhi Grameen Vidyutikaran Yojana – Scheme for Rural Electricity Infrastructure & Household Electrification". The guidelines were issued by Ministry of Power, GOI, vide letter No.44/19/2004-D(RE) dated 18th March, 2005. The scheme would be implemented through Rural Electrification Corporation (REC) and this new scheme merges the existing "Accelerated

Electrification of One lakh villages and One crore households" and Minimum Needs Programme (MNP) for rural electrification.

2. The Guidelines

The present guidelines are intended to facilitate induction of franchisee so as to fulfill the following stipulation of the MOP's guidelines for implementation of the new scheme "Rajiv Gandhi Grameen Vidyutikaran Yojana":

- (i) In the management of rural distribution through franchisees who could be Non-Governmental Organisations (NGOs), Users' Association, Cooperatives or individual entrepreneurs, the Panchayat institutions would be associated. The franchisees arrangement could be for system beyond and including feeders from substation or from and including Distribution Transformer(s).

- (ii) Based on the consumer mix and the prevailing consumer tariff and likely load, the Bulk Supply Tariff (BST) for the franchisee would be determined after ensuring commercial viability of the franchisee. Wherever feasible, bidding may be attempted for determining the BST. This Bulk Supply Tariff would be fully factored into the submissions of the State Utilities to the State Electricity Regulatory Commissions (SERCs) for their revenue requirements and tariff determination. The State Government under the Electricity Act is required to provide the requisite revenue subsidies to the State Utilities if it would like tariff for any category of consumers to be lower than the tariff determined by the SERC. While administering the scheme, prior commitments may be taken from the State Government regarding :
 - (a) Determination of Bulk Supply Tariff for franchisees in a manner that ensures their commercial viability.
 - (o) Provision of requisite revenue subsidy by the State Government to the State Utilities as required under the Electricity Act.

3. Objective

The main objective of the guidelines is to facilitate induction of franchisees, especially covering the following aspects :

- (a) Who could be a franchisee?
- (b) What would be the minimum technical / financial / expertise qualification of the franchisee?
- (c) How would a franchisee be selected?
- (d) For different sizes of franchisees, what would be their responsibilities and obligations? What would be their rights, including mode of tariff fixation?
- (e) What would be the duties / responsibilities and rights of the utility?
- (f) What would be the interface with Panchayat Raj Institutions (PRIs)?

4. What is a franchisee ?

A franchisee may be defined as an individual, group or business entity, who is granted a special right or privilege to conduct a business and especially to exercise the power of another empowered entity such as to market its goods or services in a particular territory under the entity's trade mark, trade name, or service mark and that often involves the use of rules and procedures designed by the parent entity and services and facilities provided by it (parent entity) in return for fees, royalties, or other suitable compensation.

5. What is a franchisee in the context of management of local electricity distribution in rural areas ?

A franchisee may be an entity empowered by the state to either develop / operate a generation & distribution system or ready to distribute electricity within an identified contiguous area for a prescribed duration and collect revenues directly from rural consumers. The franchisee may have the option of generating its own electricity requirement; off-take supplies from the power utility or do both. It will also have the option to expand its own sub- transmission network, on appropriate approval of the State Government / Utility, depending on the load growth of the area over a period of few years.

6. Franchisee Models

Although, the franchisee could be empowered to generate and also distribute electricity within the designated franchisee area, the present guidelines focus mainly on franchisees, who would be associated with the distribution of electricity. Supplementary guidelines would be formulated for distributed generation. There may be three (or four) basic models in the area of management of local distribution of electricity.

- i) Revenue collection franchisee - such franchisee is mainly responsible for collection of revenue on behalf of utility from the ultimate consumers in the area franchised. (Please refer 'Model - A' and 'Model - B' below)
- ii) Energy purchase, sell and collection franchisee - such franchisee shall purchase energy from the utility and sell to the consumers in the franchised area. (Please refer 'Model - C' below)
- iii) Energy purchase & sell, collection and O & M franchisee - such franchisee who, in addition to purchasing, selling and collection of energy bill (as mentioned above), shall also be responsible for the operation and maintenance of the local distribution system within the area franchised. (Please refer 'Model - D' below)

The franchisees shall be permitted to use the existing infrastructure of the utility in the area assigned to it for the desired operation with the permission of the state and the state power utility and shall not be the owner of the electricity infrastructure within the franchisee area not created by it in the course of its operation.

- iv) Electricity Co-operative as franchisee – The electric cooperative societies, which are created under the existing co-operative societies Act of the respective state governments and empowered to engage in the business of supplying electricity in the designated areas with the responsibility of operation and maintenance of the power supply, as owner of the electric infrastructure in the area of its operation (transferred to it by the utility), fall in this category.

Model – A : Revenue Franchisee- collection based This kind of franchisee may be developed with the intended role limited to billing, revenue collection, complaints redressal, facilitating release of new service connection and keeping vigil on the status of distribution network in the franchised area for providing appropriate feedback to the utility. Such Collection Franchisee would be appointed for an area and be given a target for revenue collection every month.

(which depends on the baseline collection in the area). The remuneration methodology involves:

- i) paying the franchisee margins (which will be a percentage of collections) on achievement of the target,
- ii) levy of penalty for not achieving the target and
- iii) incentives for exceeding the target.

Drawback of this system is that the franchisee is not a partner in loss reduction – since its compensation is linked to the revenue collections made – and not on the energy input coming into the area. This model is thus not preferred for adoption.

Model – B: Revenue Franchisee – Input based

In case of the input based franchisee, the input energy into the area covered by the franchisee is measured by the utility and the target for revenue collection are set based on the collections made as a percentage of the input energy supplied to the consumers beyond the point of metering by the utility. The operations and remuneration methodology of the input based franchisee is similar to that of the collection franchisee. The basic difference is in the target setting mechanism by the utility. The input based franchisee's area may be decided based on:

- i) Energy supplied by the utility through 11 kV feeder(s) as a point / location of measurement of energy supplied to franchisee and will need a metering unit in the individual 11 kV feeders.
- ii) Above system can also be distribution transformer wise located in the villages having smaller area of franchisee operation. The additional advantage of this method as compared to that of the collection franchisees is that the franchisee also becomes a partner in loss reduction and tries to reduce theft in the system.

Model – C : Input based Franchisee

This model is similar to the Revenue Based Model – with one significant difference that the franchisee will also buy the electricity from the utility and shall pay the energy charges to the utility at a pre-determined rate. The energy supplied / purchased will be as shown in the 11 kV metering unit. The franchisee will have to collect revenues from the consumers through raising bills so as to have sustainable commercial operation.

Model – D : Operation & maintenance franchisee

In this model, in addition to the franchisee operation indicated in model C above, the Utility may also hand over the operation and maintenance of 11 kV & LT feeders including distribution transformers to the franchisee based on monthly retainer basis or at an adjusted energy purchase price (of the utility), factored appropriately considering O & M cost of the franchisee.

Model – E : Rural Electric Co-operative Societies

This approach calls for the State to authorize the creation of traditional electric co-operative society that is organized, owned and operated by its members. The society owns the distribution utility assets and is

responsible for all utility functions including operations and maintenance, metering, billing and collections, accounting and finance, procurement, stores and system planning and expansion. The operations of the co-operative society involve:

- Organizes the community and recruits membership.
- Owns the distribution system and carries any debt on the assets.
- Is responsible for all facets of managing and operating the utility.
- Purchases power from the state power utility.

The society is formed through memorandum of association (MOA) and has the following key features:

- i) every household within the jurisdictional area of the society is member of the co-operative society,
- ii) ii) at the helm of the management is the Board of Directors elected by the members of the co-operative society (one member one vote),
- iii) net profit of the co-operative are to be shared amongst the members,
- iv) co-operatives are the "licensee."

Model – F : Electric cooperative society – operations management through contracting

This is a variant of the above model - E, keeping the formation procedure of the society unaltered. The BOD of the society may decide to run the operations of the society through an external experienced agency / organization with suitable fee structure, instead of operating the system itself with the concurrence of the state / utility. This can be achieved through an appropriate "operations contract" with built-in performance criteria. Deployment of efficient operation contractor (or managing agency / organization) may considerably help proper day to day operations of the electric co-operative society.

JYOTI GRAM YOJANA

An innovative Jyotigram Yojna is a scheme announced by the Government of Gujarat to provide continuous three-phase power supply, to other than agriculture consumers of rural area for upliftment of rural population. This in turn, will be beneficial to the rural villages for development of education, industries, business, health services, etc. The huge quantum of works under Jyoti Gram Yojana is completed by 31-3-07 is shown below.

Details of Work Carried out in Jyoti Gram Yojana

Investment in Rs. Crores by State Govt.	Rs. 1222 Cr.
H.T.Line Erected	54926 KM
L.T.Line Erected	21592 KM
Distribution Transformer Erected	18203 Nos.
New Feeders Erected	1543 Nos.
Agriculture Dominant Feeder	4027 Nos.
Special Design Transformer Erected	1981 Nos.
Villages getting continuous power	17826 Nos.
Petaparas getting continuous power	9701 Nos.
Scattered Farm Houses getting continuous power through SDT	About 1 lacs.

During 11th FYP coverage of more scattered houses will be covered under this scheme. This scheme is also beneficial to rural population by giving more opportunity in local employment. Development of cottage/ home industries/small-scale industries will provide better health services. Power supply will be available to villagers at most needy time. It also provides an opportunity for computer education and preparing for other examination. It helps the local dairy and milk testing process. Migration from rural to urban area will be reduced.

An amount of Rs. 10,600 Lacs to GUVNL for this scheme in the form of grant is proposed in the 11th FYP of State Govt.

Over and above these Government has also emphasized on various solar energy such as solar pump. Solar power plants, solar thermal system and Bio energy.

Chapter 7 Non - Conventional Energy

Solar Pump

The Solar Pump operates through solar energy which is pollution free and abundantly available in the state. It requires very less maintenance as compared to diesel pumps set. A typical solar pump consists of solar panel of 1800 Watts, 3 phase submersible pump delivering 42,000 liters per day at 30 meters dynamic head including 30 M HDPE pipe at a total cost of approx. at Rs.7,50,000, where as a 2 hp mono-block motor pump set delivering at an average 1,40,000 liters per day at a total head of 10 meters with a total cost of Rs. 6,20,000 are promoted under this scheme. GEDA will provide these pumps to farmer's co-operative societies for irrigation purpose. GEDA has planned to install 10 number of Solar Pumps during the year 2007-08, and it is planned to install 100 numbers Solar Pumps if found to be successful in next five years.

Solar Power Plants :-

Solar radiation from Sun is available for almost 300 days per year in the State of Gujarat with power generation potential of approximately 5.75 Kwh/Sq.m/day. GEDA is contemplated planning to carry out feasibility study for setting up of Solar Thermal Power Plant of 30 MW and Solar Photovoltaic Power Plant of 1 MW in the District of Kutchh, where sufficient Government waste land as well as maximum solar radiation is available.

Solar Thermal Systems :

Solar Cookers for domestic and community cooking and Solar Water Heaters for domestic and industrial hot water needs are becoming very popular in both urban and rural areas of the State. GEDA promotes these solar thermal systems with appropriate subsidy. GEDA has planned to supply 15065 Solar cookers, 4 numbers of Solar Steam Generating Systems for cooking and 2000 numbers of Solar Water Heaters during the year 2007-08, and it is planned to supply 50,000 Nos of Solar Cookers, 25 Nos of Solar Steam Generating Systems and 10,000 Nos of Solar Heaters in next five years.

Bio Energy :

Supplying electricity to rural area is expensive both in terms of setting transmission network as well as incurring large T&D losses. Providing sustainable rural energy security, through decentralized generation of electricity utilizing biomass and biogas as sources of energy, through community participation could be considered. It is estimated that 24 million tones of bio mass, which can generate 900 MWe power and 240 Lac cattle population which can generate 933 MWe power is available as sources of energy for generating power in the State of Gujarat.

Biomass Gasifiers :

Bio-mass Gasification is basically conversion of solid fuels i.e. wood and wood waste, agricultural residues etc into combustible gas mixture normally called "Producer gas". Solid bio-mass fuels which are usually inconvenient and have low efficiency of utilization can thus be converted into a high quality, gaseous fuel with associated convenience etc. 64 Gasifier systems with aggregate capacity of 15200 kW, which includes 5445 kW for electrical application and 9810 kW for thermal application are installed so far in the State of Gujarat. The program is successfully implemented by strong technical support and close monitoring. Innovations and R&D paved the way for more improvement in the system there by its performance. The program is well accepted in rural and urban areas of the State. GEDA has planned to generate 125 kW of power through bio-mass gasification for rural area from its own budgetary provision during the year 2007-08, and approximately 1645 kW with MNRE support and it is planned to add approximately 20 MW capacity in the State of Gujarat during next five year.

Biogas based Power Generation :

Gujarat State has live stock population of about 2.40 million. The cattle dung available from this livestock has potential for about 10 Lac m biogas production and may generate about 2000MW power.

In Gujarat total 53 kw capacity Biogas based captive power generation projects have been set up so far at various Gaushalas, Panjrapols, Nagar Palika etc. Similarly 2.00 MW capacity industrial waste based power generation project has been set up at Kanoria Chemicals, Ankleshwar.

Based on the experience gained so far and to utilize the digested slurry for composting activity and value addition approach, GEDA has taken up a project for providing power for 45 to 50 Nos of street lights in the villages during the year 2007-08 and it is planned to take up similar type of projects for power generation in 5 more village and generation of power of 1 MW through biogas, in next five years.

Chapter 8

Gas based Power Generation

Gas based power Generation

The existing capacity of gas based combined cycle power is 156.1 MW having successfully implemented the 156 MW Gas Based Combined Cycle power project at Mora, Near Surat, GSPC has now ventured in to setting up a 700 MW gas based combined cycle power plant at Pipavav.

GSPC has now initiated action for setting up a 700 MW NG/ LNG based combined cycle power plant at Pipavav comprising of two units of app. 350 MW each in phase -1 with planning to add additional 700 MW in other two phases with ultimate capacity of app. 2100 MW where by it shall be the biggest power plant in Gujarat. The required Detailed Project Report has been already prepared by Tata Consulting Engineers. The technical consultants is already appointed. GUVNL has also given its consent to buy 100% power generated by the power plants.

The 1 st phase of 700 Mw is expected to be commissioned by the end of year 2009.

The process of finalizing natural gas /LNG for the project has already been started. First phase of 700 Mw shall require app. 3.2 MMSCMD NG i.e. app. Total 0.8 MTPA of NH.

Gujarat State Petronet Limited is also in process of finalizing the design and project scheduling for laying the gas pipe line up to the project site.

GSPC, having taken up the challenge of developing the 700 MW project has taken the pro active actions and has already completed the following important mile stones.

Relying on the past experience of successful implementation of the GSEG project, GSPC group is now confident of implementing this project in the most professional manner and thereby controlling cost and time implications

Chapter 9

Hydel Power

Hydel Power

Mini Micro hydel power generation is quite useful to bridge the demand gap for power in the state, particularly to ease the peak hour demand. The potential of Gujarat from hilly streams/small rivers and canal drains has been assessed at 1,21,675 Kw. In view of the Govt.'s policy to promote renewable energy sources based power projects to bridge the power gap between demand and supply and also to promote non polluting eco-friendly projects. Govt. announced mini/micro hydel projects vide Energy & Petrochemicals Department G.R No.MMH-1097- CM-17-B dated 10-01-2005. The scheme involved incentives like wheeling, purchase price by GUVNL, banking, metering, exemption from payment of electricity duty etc.

Chapter 10

Conclusion

RE Plan for the Gujarat is prepared with a view to achieve the national goal of providing rural electricity infrastructure in all the villages and providing access to electricity to all the households in five years.

Under this ambitious RE Plan, Gujarat will electrify 49 nos. of villages and will provide access to electricity to all un-electrified 22,70,059 nos. of house holds including 9,55,150 nos. of BPL house holds under 25 nos. RGGVY projects and state Govt. funded schemes by 2012.

Govt. has already planned to enhance capacity addition for generation of electric power to meet with the requirement of additional 22,70,059 connections in the 11th Five Year Plan.

With a view to provide quality and reliable power, necessary provision for establishing new sub-stations and feeder bifurcation is also planned in the 11th Five Year Plan.

Under "Jyotigram" Scheme to provide continuous three phase power supply in rural areas necessary infrastructure are already created. The new connections which are proposed in RE plan will also be released from these infrastructure, hence the consumers of these new connections will also get uninterrupted power supply.

For optimum use of water for irrigation purpose, the scheme for giving overriding priority to the new connection already exists. Moreover Govt. is providing 50% subsidy to the farmers for establishing Micro Irrigation System in their farms. Presently the farmers are provided with scheduled minimum eight hours power supply for agriculture purpose. With the introduction of MIS the 8 hours power supply is found to be sufficient.

સચિવાલય, ગાંધીનગર. તારીખ ૦૮/૧૧/૨૦૦૫.

આમુખ :

રાજ્ય સરકારે શહેરી વિકાસ વર્ષ ૨૦૦૫ ઉજવીને ગુજરાતના શહેરોને આગવી સક્ષમતા અને ઓળખ આપવાનો પ્રયત્ન કર્યો છે અને તે અંગેના વિવિધ કાર્યોમાં દરેક શહેરોને ગૌરવપથની રચના કરવા માટે સુચના આપવામાં આવેલ છે. જે અંગે વિવિધ નગરપાલીકાઓને જનભાગીદારી સાથે ગૌરવપથની રચના કરેલ. ગૌરવપથ અંગે દરેક નગરપાલીકાઓએ સંબંધિત રસ્તાની રીસર્ફેસ, ફુટપાથ તથા આ રસ્તા પરના મકાનો અને દુકાનો માટેનો નિશ્ચિત કલર કોડ અપનાવવા સુચના અપાયેલ અને તે અનુસંધાને દરેક નગરપાલીકાઓએ પોતાના ગૌરવપથ ઉપરના મકાનો, દુકાનો વિગેરેની બહારનો કલર તેમજ નિશ્ચિત સાઈઝના સાઈનબોર્ડ, સાઈનબોર્ડના અક્ષર, સાઈનબોર્ડનો બેકગ્રાઉન્ડ કલર અને અક્ષરોનો કલર નક્કી કરેલ છે. ગૌરવપથની સુંદરતાએ ચોક્કસ પછે દરેક શહેરોના વિકાસમાં યોગ્ય પરિણામલક્ષી કાર્ય કરેલ છે. જેથી આ અંગે તમામ સત્તામંડળો/મહાનગરપાલીકાઓ અને નગરપાલીકાના સમગ્ર વિસ્તારની અંદર કોઈપણ જગ્યાએ નવા બનતા તમામ દુકાનો અને મકાનોના બહારના કલર તેમજ સાઈનબોર્ડની સાઈઝ, સાઈનબોર્ડ પરના અક્ષર અને કલર નક્કી કરેલ ગૌરવપથના કલર મુજબના રહે તે માટે કાર્યપદ્ધતિ નક્કી કરવાની બાબત અને આ બાબતની ચોક્કસ પછે અમલવારી કરાવવાની બાબત સરકારશ્રીની વિચારણાધીન હતી અને તે બાબતે પુખ્ત વિચારણાના અંતે ઉપર દર્શાવ્યા મુજબની અમલવારી કરવા નિયત કરેલ છે. આમ, કરવાથી સમગ્ર શહેરની અંદર ગૌરવપથ માટે નક્કી કરેલ કલરકોડ ધીરે ધીરે સમગ્ર શહેરમાં તમામ મકાનો ઉપર સ્વેચ્છાએ આવરી લેવાશે અને તેના કારણે શહેરની સુંદરતા વધશે. સદર બાબતે રાજ્યના સત્તામંડળોના જી.ડી.સી.આર.માં ગૌરવપથ અને સંલગ્ન જોગવાઈ કરવી જરૂરી છે.

હુકમ :

આથી ગુજરાત નગર રચના અને શહેરી વિકાસ અધિનિયમ-૧૯૭૬ની કલમ-૧૨૨ની પેટા કલમ (૧) હેઠળ મળેલી સત્તાની રૂએ સરકારશ્રી રાજ્યના તમામ નગરપાલીકા વિસ્તાર/મહાનગરપાલીકા વિસ્તાર, શહેરી/વિસ્તાર વિકાસ સત્તામંડળો, રચાયેલા/મુકરર કરાયેલા સત્તામંડળોના વિસ્તારની અંદર નવી બનતી તમામ દુકાનો અને મકાનોના બહારના કલર તેમજ સાઈનબોર્ડની સાઈઝ, સાઈનબોર્ડ પરના અક્ષર અને કલર નક્કી કરેલ ગૌરવપથના કલર મુજબના રહે તે માટે કાર્યપદ્ધતિ નક્કી

કરવી અને આ બાબતની ચોક્કસ પણે અમલવારી કરાવવા હુકમ કરવામાં આવે છે. આમ, કરવાથી સમગ્ર શહેરની અંદર ગૌરવપથ માટે નક્કી કરેલ કલરકોડ ધીરે ધીરે સમગ્ર શહેરમાં તમામ મકાનો ઉપર સ્વેચ્છાએ આવરી લેવાશે અને તેના કારણે શહેરની સુંદરતા વધશે. જે માટે ગૌરવપથમાં એક સરખા નમુનાના રસ્તાઓ, એક સરખા રંગથી સુશોભન વિગેરેની જોગવાઈ લાગુ પાડવા અધિનિયમની કલમ-૧૯ હેઠળ સુધારો કરીને ઉમેરવા સંબંધિત સત્તામંડળોના જી.ડી.સી.આર.માં સુધારો કરવા આથી હુકમ કરે છે. તેમજ કલમ-૧૯ હેઠળ આવા ફેરફારો અમલમાં ન આવે ત્યાં સુધી આ હુકમની તારીખતી કરાયેલ ફેરફાર મુજબ અમલ કરવા જણાવવામાં આવે છે.

રાજ્યમાં પ્રદૂષણ નિયંત્રણ, પર્યાવરણની જાળવણી, ઉર્જાના વૈકલ્પિક સાધનોનો ઉપયોગ વગર બાબતે સક્રિય રીતે વિચારીને સભાનતા કેળવીને ઉચિત ઉપાયો કરવાની રાજ્યના સમુચિત સત્તામંડળોની પ્રાથમિક ફરજ બને છે. પેટ્રોલ-ડીઝલ અને ઉર્જાના અન્ય ભંડારોનો કરકસરપૂર્વક ઉપયોગ કરવો અને પેટ્રોલ-ડીઝલના સ્થાને ઉર્જાના વિકલ્પોનો ઉપયોગ કરવો એ આજના સમયની તાતી માંગ છે. શહેરો/નગરો અને ગામોમાં પેટ્રોલથી ચાલતી જુની રીક્ષાઓ અને અન્ય વાહનો ક્રમશઃ નાબુદ કરીને સી.એન.જી રીક્ષાઓનો ઉપયોગ કરીને પ્રદૂષણ નિયંત્રણ, પર્યાવરણલક્ષી સુધારણા અને પેટ્રોલ ડિઝલની બચતનો ત્રેવડો લાભ શહેરો અને નગરોએ લેવાનો રહે છે. શહેરને હવાના પ્રદૂષણથી મુક્ત બનાવવા અંગે નામદાર સુપ્રિમ કોર્ટના આદેશો અન્વયે રચાયેલી મા.શ્રી ભુરેલાલ કમિટીની ભલામણ મુજબ રાજ્યમાં ઓટોમોબાઈલ્સ ફ્યુઅલ જેવા કે એલપીજી/સીએનજીનો વપરાશ થાય અને આ અંગે અવારનવાર સમીક્ષા થવી પણ ફરજિયાત બનેલી છે. વાહનો માટે એલપીજી ગેસ કીટના ઉપયોગને અને એલપીજી દ્વારા વાહન ચલાવવાને અધિકૃત માન્યતા આપવામાં આવેલ છે. વાહન ચલાવવા એલ.પી.જી ગેસ અને સીએનજી ગેસના ઉપયોગનો ખ્યાલ છેલ્લા બે વર્ષથી પ્રચલિત અને પ્રાપ્ય થયેલ હોઈ ગુજરાત નગર રચના અને શહેરી વિકાસ અધિનિયમ

૧૯૭૬ હેઠળ રચાયેલ રાજ્યના સમુચિત સત્તામંડળની હાલના મંજૂર અમલી વિકાસ યોજનાઓના સામાન્ય વિકાસ નિયંત્રણ વિનિયમોમાં એલપીજી/સીએનજી ફીલ્ડિંગ સ્ટેશનોની મંજૂરી અંગેનો કોઈ ઉલ્લેખ નથી. જો કે સને ૨૦૦૨ માં મંજૂર થયેલ અમદાવાદ શહેરી વિકાસ સત્તામંડળની વિકાસ યોજનાના જીડીસીઆરમાં એલપીજી/સીએનજી ફીલ્ડિંગ સ્ટેશનની મંજૂરીની બાબત સમાવી લેવાયેલ છે. તાજેતરમાં સુરત શહેરી વિકાસ સત્તામંડળની વિકાસ યોજનાના જીડીસીઆરમાં પણ એલપીજી/સીએનજી ફીલ્ડિંગ સ્ટેશનની મંજૂરી આપવા અંગે સુધારો કરાયેલ છે. રાજ્યના સમુચિત સત્તામંડળો દ્વારા ભવિષ્યમાં નવી તૈયાર થતી વિકાસ યોજનાના જીડીસીઆરમાં એલપીજી/સીએનજી ફીલ્ડિંગ સ્ટેશનો મંજૂરી અંગે જોગવાઈ કરવામાં આવે અને હાલની મંજૂર અમલી વિકાસ યોજનાના જીડીસીઆરમાં ગુજરાત નગર રચના અને શહેરી વિકાસ અધિનિયમ-૧૯૭૬ ની કલમ-૧૯ હેઠળ આ અંગે ફેરફાર સૂચવવામાં આવે તે માટે રાજ્યના સમુચિત સત્તામંડળોને સૂચના આપવાની બાબત સરકારશ્રીની સક્રિય વિચારણા હેઠળ હતી. આથી પુખ્ત વિચારણાને અંતે રાજ્ય સરકાર ગુજરાત નગર રચના અને શહેરી વિકાસ અધિનિયમ-૧૯૭૬ ની કલમ-૧૨૨ હેઠળ મળતી સત્તાની રૂએ નીચે મુજબનો હુકમ કરે છે.

ગુજરાત નગર રચના અને શહેરી વિકાસ અધિનિયમ, ૧૯૭૬ હેઠળ રચાયેલા અને મુકરર કરાયેલા સત્તામંડળોએ તેમના વિકાસ વિસ્તાર માટેની પુનરાવર્તીત વિકાસ યોજનાની દરખાસ્ત તૈયાર કરતી વખતે રહેણાંક, વાણિજ્ય, ઔદ્યોગિક અને ખેતી વિષયક ઝોનમાં એલ.પી.જી/ સી.એન.જી ફીલ્ડિંગ સ્ટેશનની મંજૂરીની જોગવાઈ અચૂક સામેલ કરવાની રહેશે. હાલની મંજૂરી અમલી વિકાસ યોજનાઓના સામાન્ય વિકાસ નિયંત્રણ વિનિયમોના ઝોનીંગ ટેબલમાં રહેણાંક વાણિજ્ય, ઔદ્યોગિક અને ખેતી વિષયક ઝોનમાં એલ.પી.જી/ સી.એન.જી ફીલ્ડિંગ સ્ટેશનોની મંજૂરી આપવા અંગેનો ફેરફાર આમેજ કરવા માટે ગુજરાત નગર રચના અને શહેરી વિકાસ અધિનિયમ-૧૯૭૬ની કલમ-૧૯ હેઠળની કાયદા નિયમાનુસારની દરખાસ્ત તુરત જ રાજ્ય સરકારશ્રીને મોકલી આપવા અને જ્યાં સુધી કલમ-૧૯ હેઠળનો આવો ફેરફાર મંજૂર અમલી ન બને ત્યાં સુધી ગુજરાત નગર રચના અને શહેરી વિકાસ અધિનિયમ-૧૯૭૬ ની કલમ-૧૨૨ હેઠળ અપાયેલ આ હુકમનો અમલ કરીને સમુચિત સત્તામંડળોના વિકાસ વિસ્તારમાં રહેણાંક, વાણિજ્ય, ઔદ્યોગિક અને ખેતી વિષયક ઝોનમાં એલ.પી.જી/ સી.એન.જી ફીલ્ડિંગ સ્ટેશનના ઉપયોગ માટે પરવાનગી આપવા તમામ સમુચિત સત્તામંડળોને આથી હુકમ કરવામાં આવે છે.
